TREASURE

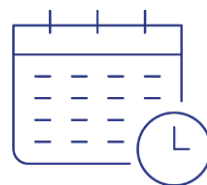

TESTING NOVEL ENVIRONMENTAL QUALITY MEASURES IN AND AROUND EURO-MED PORTS

OUR PROJECT

TREASURE is a project co-financed by the **Interreg Euro-MED** programme. It aims at improving environmental quality in and around Mediterranean port areas, by mitigating and reducing sediment and water pollution. The overall challenge that TREASURE wishes to tackle is that of the **fragile environmental quality** of Mediterranean port areas. In order to improve it, TREASURE will perform transnational testing of integrated, multi-stakeholder support environments, merging three multi-disciplinary elements: a stakeholder ecosystem to create **open pilot laboratories**, integrated approach to **environmental quality assessment** and experimentation of **novel techniques** to restore degraded and polluted port areas.

Total budget
€ 2,501,581.50

Project duration
33 months

Interreg Funds
€ 2.001.265,20
