Participation in Matchmaking Activities

- **Targeted discussions** focused on *environmental and operational needs*
- **Direct engagement** with *solution providers*
- **Comprehensive inquiry** and *evaluation of practicality*
- **Exchange of knowledge** and *experiences among participants*
- **Building mutual trust** to *support collaboration*
- **Accurate evaluation** of *readiness for innovation*
- **Differentiating clearly** between *preliminary concepts* and *fully matured solutions*

Solutions that attracted interests

Environmental Monitoring Technologies

Monitoring technologies enable early detection of air and water quality issues, helping prevent environmental incidents at ports.

Pollution Prevention and Mitigation

Solutions focus on controlling emissions and reducing pollution, aligning with everyday environmental pressures faced by ports.

Decision-Support Tools

Decision-support tools improve situational awareness and enable data-driven planning and responses for port operations.

Integration with Port Infrastructure

Solutions that integrate with existing infrastructure reduce implementation barriers and increase operational practicality.

Innovation and Added Value

Challenge-Solution Link

The Catalogue links port environmental challenges directly with relevant, implementable solutions.

Operational Relevance

Content tailored to real port operations ensures practical and relevant innovation guidance.

Collaborative Platform

The Catalogue encourages collaboration by connecting ports with solution providers and peers.

Barrier Reduction for Innovation

Supports ports with limited resources by lowering barriers to adopting new technologies.
